Dear Parents,

This year is passing in a very fruitful and successful way. As time passes, we are able to see our students grow intellectually and socially.

On Monday, February 29th, 2016, a LEAP year Day, the Math Department is planning on celebrating the 100th Day of the school year. Our main aim is to show students how much they have learned throughout the days. This is going to be accomplished through different activities which will be held in their classes. A lot of work and effort is going to be required from our students, and we would appreciate your cooperation.

In order to make this day remarkable one, souvenirs will be available for 5000LL for those who place their orders with their math teachers prior to February 20th, 2016. The proceeds of this activity will be donated to the BBS Go Green Account. For more information, check our website www.bbs.edu.lb.

The 100th Day is going to flourish with your cooperation.

Yours,

Elementary Math Teachers
